1.0 BRAND INTRODUCTION

FOLLOW THESE GUIDELINES AS YOU CREATE MARKETING MATERIALS, INTERNAL & EXTERNAL COMMUNICATIONS.

THE DESIGN FOUNDATION

The brand is more than our logo. It is a design scheme made up of a number of core elements and guiding principles that combine to create a distinctive look and feel that is immediately recognisable as TEXTIT Coin.

This guide will help to familiarize you with the core brand elements to assist you in designing and producing dynamic and powerful communications with a degree of flexibility.

2.0 MASTER LOGO

The company logo is an important and valued graphic element and must be used consistently and appropriately, even minor variations will undermine and compromise the image of the branding.

We use the same version in print, on screen, and on our digital media. It's simple. Easy to understand. No drop shadows, no glossy reflections, no flashy graphic effects.

There are only three ways to use the logo:

- Colour - on bright backgrounds
- Black - on white background
- White Reverse on a dark, even toned background

When selecting the logo colour, the aim is to ensure the logo has maximum impact;

ie, the greatest contrast with the background and other competing elements.

Wherever possible, use the TEXTIT Coin colour version of the logo.
